

# POISON CONTROL CENTRE OF ZAGAZIG UNIVERSITY SEMIANNUAL REPORT BY THE END OF 2016

Poisoning is the leading cause of injury-related death in theEGc In 2016, there were 7 poison centers serving 90 million people, nationwide. Poison centers managed over million cases, about 50% of which were about people coming into contact with dangerous or potentially dangerous substances. These types of cases are called exposures However all the problems facing management of poisoning classified as administrative and non administrative can be overcome by development of non profit natonal poison control centres with all of its requirments. **Poison control centre of zagazig university was started at 17 july 2016 by four main units to display a critical role in management of poisoning**

## I ) Information unit

Has Provided information on the signs and symptoms of poisoning, both by individual chemicals and by mixtures of chemicals as found in commercial products to aid diagnosis with such information

Who calls the poison center? Anyone can experience a poison emergency. Poison centers take calls from and manage cases about people of all ages, and can provide help in English and arabic languages. In 2016 just under half of exposure cases managed by poison centers involved children younger than six, but as in previous years, many of the more serious cases occurred among adolescents and adults. Toxicovigilance and advice on prevention of poisoning and development of preventive measures

This has been achieved by constructing and excecuting a plan to update protocoal of management and visit more than 20 rural ministry hospitals of zagazxig country by the end of 2016
